D-FREE

Curriculum Guideline for Medcial Practitioners in Rwanda

June 2025

Organizer

Brian Lee

Organization

D-FREE

Program

Step 1: Introduction (30 minutes)

- Introduction to diarrheal health issue.
- Discuss the objective of D-Free and its main project of health support via medication.
- Introduce the overview of training course.

Outcome: Participants are capable of understanding the significance and goal of the project.

Step 2: Medication #1 (40 minutes)

- Introduction to the first solution medication, oral rehydration therapy (ORT).
- Mastery of its accurate dosage and administration.
- Explanation of its mechanism, impact, and effectiveness.
- Acquisition of external information - storage, side effects, etc.

Outcome: Participants master their knowledge of ORT and fully understand its usage.

Step 3: Medication #2 (40 minutes)

- Introduction to the second solution medication, zinc supplements.
- Mastery of its accurate dosage and administration.
- Explanation of its mechanism, impact, and effectiveness.
- Acquisition of external information - storage, side effects, etc.

Outcome: Participants master their knowledge of zinc supplements and fully understand its usage.

Step 4: Medication #3 (40 minutes)

- Introduction to the third solution medication, vitamin A supplements.
- Mastery of its accurate dosage and administration.
- Explanation of its mechanism, impact, and effectiveness.
- Acquisition of external information - storage, side effects, etc.

Outcome: Participants master their knowledge of vitamin A supplements and fully understand its usage.

Step 5: Medication #4 (40 minutes)

- Introduction to the fourth solution medication, probiotic supplements.
- Mastery of its accurate dosage and administration.
- Explanation of its mechanism, impact, and effectiveness.
- Acquisition of external information - storage, side effects, etc.

Outcome: Participants master their knowledge of probiotic supplements and fully understand its usage.

Step 6: Supply of medication (20 minutes)

- Understand the stock management and supply chain considerations for all four medication options.

Outcome: Participants know where to receive medication supplies from, as well as how.

Step 7: Review of limitations (40 minutes)

- Understand that side-effects of such medications are serious issues to handle.
- Re-acknowledge negative symptoms of such medications, as well as solutions to treat them.

Outcome: Participants master the limitations of all four medications, as well as their corresponding treatments for cure.

Step 8: Summary of content (10 minutes)

- Speed-run the program content for review and acknowledge areas for further acquisition of knowledge on.

Outcome: Participants become experts of the program and are capable of supporting local Rwandan communities with diahrreal issues.
